

Biodiversity and Deforestation-Free Policy

Primax Electronics Co., Ltd. (hereinafter referred to as “the Company”) is committed to corporate sustainability. Maximizing environmental protection is one of the core objectives of the Company's sustainability strategy. We fulfill our compliance obligations in our manufacturing activities, product design and services; actively respond to international environmental initiatives; and lead our employees, suppliers and other key business partners in the value chain to put into practice our commitment to a sustainable environment.

Applicable objects and scope

This policy applies to Primax, its subsidiaries in which it holds more than 50% of the shares, suppliers, service providers, contractors and other major business value chain partners. The applicable scope includes product research and development, procurement, production operations, distribution and transportation, and waste management. The Company follows this policy to fulfill its management responsibilities and promote environmental sustainability.

To support the Biodiversity and Forestry Initiative, we actively:

- Examine the dependence and impact of operational activities on natural resources, and avoid the ecological impact caused by these activities.
- Support various initiatives for deforestation-free and biodiversity preservation, and continue to promote actions through supply chain communication.
- Promote feasible ecological conservation activities through stakeholder cooperation and integration of the organization's core competencies.
