

2024 Primax Conflict Minerals Report

1. Company Overview

Primax, founded in 1984, is a leading provider of solutions in information technology, electronics, and consumer products. The Company's global operations headquarters is located in Neihu Technology Park in Taipei, while the Liuwu Plant in Dongguan, China, serves as the Group's primary manufacturing base. To support global supply chain strategies and production diversification, the Thailand Plant continued to expand its shipment volume in 2024, with quality and cost performance steadily aligning with the Group's facilities in China. Primax is among the few global enterprises with core strengths in both vision and acoustic technologies. Our R&D efforts are focused on advancing X-IN-1 Sensory Fusion applications, driving innovation through the seamless integration of visual, acoustic, and human-machine interface technologies. Building on its core strengths in microphones, camera modules, and speakers, along with robust manufacturing capabilities, Primax has positioned itself as a comprehensive provider of X-IN-1 Sensory Fusion solutions. By harnessing the power of AI to enhance the integration of multi-sensory technologies, the Company is laying the foundation for its next wave of growth in the era of artificial intelligence.

Tymphany, a Primax subsidiary, operate smajor manufacturing facilities in Huizhou and Dongguan, China, as well as in the Czech Republic through Tymphany (Czech Republic). The company specializes in the research, design, manufacturing, and sales of acoustic components, headphones, and microphones. The Group has established global R&D centers in Beijing, Shenzhen, and Taiwan, supported by logistics hubs and sales offices in the United States and Japan to serve key consumer markets. As a solutions provider across information technology, electronics, and consumer products, the Group remains committed to delivering high-quality and responsive service to its global customer base.

Operating Headquarters	Taipei and R&D Center	931 employees
Major Production Sites	Primax (Dongguan)	2,949 employees
	Chongqing	1,296 employees
	Kunshan	302 employees
	Thailand	946 employees
R&D Center	Beijing	40 employees
Logistics and Sales Centers	USA	11 employees
	Japan	3 employees

Operating Headquarters	Huizhou Operating Headquarters, Manufacturing Facility, and R&D Center	1,357 employees
Major Production Sites	Dongguan	642 employees
	Czech Republic	278 employees
	Thailand	600 employees
R&D Center	Taipei	420 employees
Overseas Business	Europe	9 employees
	UK	30 employees
	USA	18 employees

2. Responsible Minerals Policy, Implementation and Due Diligence

Responsible Minerals Policy :

Primax Electronics, Ltd (referred to as "Primax") dedicate to support Conflict Mineral Law as well as actions of Corporate Social Responsibility & Sustainability Development. Primax leverage GP-Portal® (Green product management platform) as a communication carrier to engage all suppliers by fully disclosing minerals sources from smelters validated by Responsible Minerals Plan (Responsible Minerals Initiative, RMI).

Moving forward, Primax take conflict minerals inspection as due diligent, will follow upcoming agenda, dynamically adopt necessary actions, continue initiates and engage with its suppliers. Primax as a leading company expect to realize global human right protection raising through supporting Responsible Minerals Policy.

Primax commits that:

1. Primax will not purchase products containing minerals (such as tantalum (Ta), tin (Sn), tungsten (W) and gold (Au) cobalt (Co), mica...) mining from human rights violations areas, etc.
2. Primax purchase 3TG materials from Conflict-Free smelters validated by CFSP or equivalent certification, and do not prohibit qualified materials from Democratic Republic of the Congo and its surrounding countries.
3. Primax follow OECD DDG standards with due diligence to perform supplier management and risk mitigation.
4. Primax request its suppliers follow same commitments listed above, and engage their upstream suppliers' to join us and follow the same.

Implement and supervise:

Since 2012, Primax has explicitly complied with the Conflict Minerals Regulation, prohibiting the use and procurement of conflict metals (such as tantalum, tin, gold, and tungsten) sourced from conflict-affected regions of the Democratic Republic of the Congo. The Company requires all suppliers to commit to responsible sourcing of minerals and strives to ensure that minerals used in its products (including tantalum,

tin, gold, and tungsten) do not contribute to funding armed conflict. This policy has been incorporated as a mandatory requirement in supplier procurement management and product design. Suppliers utilizing conflict metals are required to disclose smelter information and declare it through the Primax green product management platform, GP-Portal®.

Furthermore, as the electric vehicle industry has rapidly expanded, the applications of rechargeable batteries have also increased significantly. Accordingly, since 2020, Primax Group has required suppliers to disclose information related to the use of cobalt. Our current disclosure scope covers cobalt refiners and recyclers; facilities engaged solely in the production of battery cathodes, alloys, or ceramics are considered downstream entities and are therefore not classified as refiners.

In the course of its investigations, Primax references the list of qualified 3TG smelters established by the Responsible Minerals Initiative (RMI) and requires suppliers to use only smelters certified by the RMI. In addition, we regularly cross-check our records against the latest smelter lists to ensure that all materials in use comply with current requirements. In 2024, among the smelters utilized, 31 were removed from the qualified list due to failing to pass the RMI's audit. In response, we immediately launched a supply chain investigation and required suppliers to verify the smelter usage status of their upstream material manufacturers to ensure that no disqualified smelters would be inadvertently used. At the same time, Primax also adheres to the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, identifying risks within the Company's supply chain and conducting risk assessments in accordance with the supply chain policy standards and due diligence recommendations outlined in Annex II of the Guidance. In 2024, a total of 301 suppliers underwent conflict minerals management and due diligence risk identification and assessment.

3. Due Diligence Results

Smelter disclosure within our supply chain in 2024, suppliers declared a total of 253 smelters. Among them, gold accounted for the largest number, with 88 smelters, followed by tin (61), cobalt (38), tantalum (34), and tungsten (32). All smelter sources and their countries of distribution, as shown below, are traceable.

The following is a list of qualified smelters for Primax

Metal	CID NO	Country	Geography	Smelter Name
Cobalt	CID003406	AUSTRALIA	Oceania	Murrin Murrin Nickel Cobalt Plant
