

# Greenhouse Gas Verification Opinion

The inventory of Greenhouse Gas emissions in year 2025 of

## Primax Electronics (CQ) Corp., Ltd.

No. 2669, Xinglong Road, Yongchuan, Chongqing City, P.R. China

has been verified in accordance with ISO 14064-3:2019 as meeting the requirements of

## ISO 14064-1:2018

Opinion Type: Modified

Direct emissions

**547.5082** tonnes of CO<sub>2</sub>e

Indirect emissions

**172,712.4478** tonnes of CO<sub>2</sub>e

Direct emissions and indirect emissions

**173,259.956** tonnes of CO<sub>2</sub>e

Authorized by

Stephen Pao

SGS has been contracted for the verification of direct and indirect Greenhouse Gas emissions in accordance with

### **ISO 14064-3:2019**

as provided by Primax Electronics (CQ) Corp., Ltd. (hereinafter referred to as “Primax\_CQ” ), No. 2669 Xinglong Road, Yongchuan, Chongqing City, P.R. China., in the GHG Statement in the form of GHG report.

### **Roles and responsibilities**

- The management of Primax\_CQ is responsible for the organization’s GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.
- The verification was based on the verification scope, objectives and criteria as agreed on 19 June 2023 and 16 December 2024.
- Verification Criteria: ISO 14064-1:2018
- Verification Period: 02 March 2026 to 27 March 2026.

### **Scope**

- GHG information for the following period was verified: 01 January 2025 to 31 December 2025
- Location/boundary of the activities:
  - No.2669, Xinglong Road, Yongchuan, Chongqing City, China
- Types of GHGs included: CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, NF<sub>3</sub>
- The IPCC 2021 AR6 GWP values are applied in this inventory.
- Emission factor:
  - Direct emissions: Greenhouse Gas Emission Factor, MOENV (2024.02.05).
  - Indirect emissions:
    - Electricity emission factor is National average electricity CO<sub>2</sub> emission factor: 0.5306 kgCO<sub>2</sub>e/kWh and National average electricity CO<sub>2</sub> emission factor (excluding non-fossil electricity under market-based transactions): 0.6096 kgCO<sub>2</sub>e/kWh (Announced by Ministry of Ecology and Environment, China in 2025).
    - The secondary database has Carbon Footprint Information Platform, China LCA database ( 2022 ) 、 U.S. LCI Database 、 EF Database 2.0 、 Ecoinvent 2.2 、 Ecoinvent 3.9.1 、 DK Input Output Database 2003 、 Ecoprofiles Plastics Europe 2011-2015 、 Green technical and CFP assessment 、 ICAO Carbon Emissions Calculator.

- The level of assurance for category 1 and category 2 agreed is that of reasonable assurance. Category 3 to category 6 agreed is that of limited assurance.
- Materiality : 5%
- The version of inventory sheet: 20260424
- The version of GHG statement: 20260424
- Intended user of the verification opinion: Private

### Objective

The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the GHG emissions are as declared by the organization's GHG statement
- The data reported are accurate, complete, consistent, transparent and free of material error or omission.

### Conclusion

SGS's approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions. We planned and performed our work to obtain the information, explanations and evidence that the GHG emissions of category 1 and category 2 are free from material misstatement and nothing has come to our attention to cause us to believe that the GHG statement for category 3 to category 6 is materially misstated.

- The greenhouse gas emissions is 173,259.956 metric tonnes of CO<sub>2</sub> equivalent
- The emissions from the combustion of biomass is 0.0000 metric tonnes of CO<sub>2</sub> equivalent

The emission of each category is described as below:

Unit: tonnes of CO<sub>2</sub>e

| Reporting Boundaries |                                                                                   | GHG Emissions  |              |

- The opinion of SGS is modified in accordance with the following described circumstances.
  - The verifier has sufficient and appropriate evidence to support the material emissions, removals, or storage.
  - The verifier applies appropriate criteria for the material emissions, removals, or storage.

- When the verifier intends to rely on relevant controls, the effectiveness of those controls has been assessed.
- The verifier, applying the ISO 14064-1:2018 standard, presents the following findings. After adjustments and corrections, no material errors were identified.
  - Correction of certain activity data.
- Retention Limitation: NA
- Additional Notes: NA

### **Confidentiality**

The reports and attachments may contain relevantly confidential information of the clients. In addition to being submitted as governmental application or certification documents, the reports and attachments are not allowed to be edited, duplicated, or published without the clients' agreement in written form.

### **Avoidance of Conflict of Interest**

The reports and attachments are completely complied with the standards and procedures that related authorities established. The reports and attachments of auditing process are conduct with fairness and honesty. If not, the auditing institution not only has to bear the relevant compensation duties, but also to receive legal charge and punishment.

This opinion shall be interpreted with the GHG statement of Primax\_CQ as a whole.

### Verifier Group

Above opinions coincide with auditing process with fairness and impartiality and aim at the emission of clients.
