

Greenhouse Gas Verification Opinion

The inventory of Greenhouse Gas emissions in year 2025 of

Tymphany Acoustic Technology (Huizhou) Co., Ltd.

Tymphany Intelligent Audio Technology Industrial Park, Hua Guo Villiage, Xinxu Town, HuiYang District, Huizhou City, Guangdong Province, China

has been verified in accordance with ISO 14064-3:2019 as meeting the requirements of

ISO 14064-1:2018

Opinion Type: Modified

Direct emissions

741.2654 tonnes of CO₂e

Indirect emissions

545,743.7819 tonnes of CO₂e

Direct emissions and indirect emissions

546,485.047 tonnes of CO₂e

Authorized by

Stephen Pao

Business Assurance Director

Date: 09 July 2026

Version 1

TGP56B-15-1 2601

SGS Taiwan Ltd.

No. 136-1, Wu Kung Road, New Taipei Industrial Park,

Wu Ku District, New Taipei City 248016, Taiwan

The emission of each category is described as below:

Unit: tonnes of CO₂e

Reporting Boundaries		GHG Emissions	
Inventory categories	Description	Location-based	Market-based
Direct emissions	Direct emissions from stationary combustion	13.1882	
	Direct emissions from mobile combustion	0.0000	
	Direct process emissions and removals from industrial processes	0.0000	
	Direct fugitive emissions arise from the release of GHGs in anthropogenic systems	728.0772	
	Direct emissions and removals from land use, land use change and forestry	0.0000	
Indirect emissions	Imported energy	4,404.6342	1,524.7516
	Transportation	Indirect emissions from upstream transport and distribution of martial	165.2103
		Indirect emissions from downstream transport and distribution of goods	31.6616
		Indirect emissions from employee commuting	125.8500
		Indirect emissions from Business Travel	204.5748
	Products used by an organization	Indirect emissions of raw materials and consumables related to production and purchase in the factory	150,797.8161
		Indirect emissions from the upstream use of electricity and fuel	1,072.0112
		Indirect emissions from waste outsourcing treatment and transportation	99.0190
	Associated with the use of products from the organization	Indirect emissions from product use	388,843.0048
	Other sources	No significant emissions	NA
Direct emissions and indirect emissions		546,485.047	543,605.165

Purchased Renewable Energy Certificate(s) Information				
Site/Location	Type	Renewable Energy Source/Location	Imported energy emissions	
			Location-based	Market-based
Tymphany_HZ	GEC	Solar/China	4,404.6342	1,524.7516

SGS has been contracted for the verification of direct and indirect Greenhouse Gas emissions in accordance with

ISO 14064-3:2019

as provided by Tymphany Acoustic Technology (Huizhou) Co., Ltd. (hereinafter referred to as “Tymphany_HZ”), Tymphany Intelligent Audio Technology Industrial Park, Hua Guo Villiage, Xinxu Town, HuiYang District, Huizhou City, Guangdong Province, China, in the GHG Statement in the form of GHG report.

Roles and responsibilities

- The management of Tymphany_HZ is responsible for the organization’s GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.
- The verification was based on the verification scope, objectives and criteria as agreed on 24 July 2023, 20 December 2024 and 03 October 2025.
- Verification Criteria: ISO 14064-1:2018
- Verification Period: 02 March 2026 to 27 March 2026.

Scope

- GHG information for the following period was verified: 01 January 2025 to 31 December 2025
- Location/boundary of the activities:
 - Tymphany Intelligent Audio Technology Industrial Park, Hua Guo Villiage, Xinxu Town, HuiYang District, Huizhou City, Guangdong Province, China
 - 11F, block A, CEC Bldg, No.2070, Shennan Zhong road, Huaqiang North, Futian District, Shenzhen, China
- Types of GHGs included: CO₂, CH₄, N₂O, HFCs, PFCs, SF₆, NF₃
- The IPCC 2021 AR6 GWP values are applied in this inventory.

- Emission factor:
 - Direct emissions: Greenhouse Gas Emission Factor, MOENV (2024.02.05), IPCC Guideline 2006 and the results of a third-party
 - Indirect emissions:
 - Electricity emission factor is National average electricity CO₂ emission factor: 0.5306 kgCO₂e/kWh and National average electricity CO₂ emission factor (excluding non-fossil electricity under market-based transactions): 0.6096 kgCO₂e/kWh (Announced by Ministry of Ecology and Environment, China in 2025).
 - The secondary database has Carbon Footprint Information Platform, China LCA database(2022)、U.S. LCI Database、Ecoinvent 2.2、Ecoinvent 3.9.1、DK Input Output Database 2003、ICAO Carbon Emissions Calculator.
- The level of assurance for category 1 and category 2 agreed is that of reasonable assurance. Category 3 to category 6 agreed is that of limited assurance.
- Materiality : 5%
- The version of inventory sheet: 20260424
- The version of GHG statement: 20260424
- Intended user of the verification opinion: Private

Objective

The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the GHG emissions are as declared by the organization's GHG statement
- The data reported are accurate, complete, consistent, transparent and free of material error or omission.

Conclusion

SGS's approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions. We planned and performed our work to obtain the information, explanations and evidence that the GHG emissions of category 1 and category 2 are free from material misstatement and nothing has come to our attention to cause us to believe that the GHG statement for category 3 to category 6 is materially misstated.

- The greenhouse gas emissions is 546,485.047 metric tonnes of CO₂ equivalent
- The emissions from the combustion of biomass is 0.0000 metric tonnes of CO₂ equivalent

The emission of each category is described as below:

Unit: tonnes of CO₂e

Reporting Boundaries			GHG Emissions	
Inventory categories		Description	Location-based	Market-based
Direct emissions		Direct emissions from stationary combustion	13.1882	
		Direct emissions from mobile combustion	0.0000	
		Direct process emissions and removals from industrial processes	0.0000	
		Direct fugitive emissions arise from the release of GHGs in anthropogenic systems	728.0772	
		Direct emissions and removals from land use, land use change and forestry	0.0000	
Indirect emissions	Imported energy	Indirect emissions from imported electricity	4,404.6342	1,524.7516
	Transportation	Indirect emissions from upstream transport and distribution of martial	165.2103	
		Indirect emissions from downstream transport and distribution of goods	31.6616	
		Indirect emissions from employee commuting	125.8500	
		Indirect emissions from Business Travel	204.5748	
	Products used by an organization	Indirect emissions of raw materials and consumables related to production and purchase in the factory	150,797.8161	
		Indirect emissions from the upstream use of electricity and fuel	1,072.0112	
		Indirect emissions from waste outsourcing treatment and transportation	99.0190	
	Associated with the use of products from the organization	Indirect emissions from product use	388,843.0048	
	Other sources	No significant emissions	NA	
Direct emissions and indirect emissions			546,485.047	543,605.165

Tymphany_HZ purchased 5,800 MWH Renewable Energy in 2025. The imported energy emissions by location-based and market-based approach shown as the following table :

Unit: tonnes of CO_{2e}

Purchased Renewable Energy Certificate(s) Information				
Site/Location	Type	Renewable Energy Source/Location	Imported energy emissions	
			Location-based	Market-based
Tymphany_HZ	GEC	Solar/China	4,404.6342	1,524.7516

- The opinion of SGS is modified in accordance with the following described circumstances.
 - The verifier has sufficient and appropriate evidence to support the material emissions, removals, or storage.
 - The verifier applies appropriate criteria for the material emissions, removals, or storage.
 - When the verifier intends to rely on relevant controls, the effectiveness of those controls has been assessed.
 - The verifier, applying the ISO 14064-1:2018 standard, presents the following findings. After adjustments and corrections, no material errors were identified.
 - Correction of certain activity data.
- Retention Limitation: NA
- Additional Notes: NA

Confidentiality

The reports and attachments may contain relevantly confidential information of the clients. In addition to being submitted as governmental application or certification documents, the reports and attachments are not allowed to be edited, duplicated, or published without the clients' agreement in written form.

Avoidance of Conflict of Interest

The reports and attachments are completely complied with the standards and procedures that related authorities established. The reports and attachments of auditing process are conduct with fairness and honesty. If not, the auditing institution not only has to bear the relevant compensation duties, but also to receive legal charge and punishment.

This opinion shall be interpreted with the GHG statement of Tymphany_HZ as a whole.

Verifier Group

Above opinions coincide with auditing process with fairness and impartiality and aim at the emission of clients.
