**UL Solutions Project No.:** 4791993993  
**UL Solutions Order No.:** 16048991  
**Subject:** Environmental Claims Validation for Dongguan  
Tymphany Acoustic Technology Co., Ltd.

Dear Lucas,

Congratulations! All auditing and analysis work associated with above mentioned project number has been completed. Please refer to the following page for all environmental claims that were validated and the methods used for validation. The facility and products listed in this report are eligible to bear the UL Solutions Environmental Claims Validation Logo, in accordance with the ECV Guidelines.

Auditing conducted to validate environmental claims was performed on a sample of available documentation, products and materials.

The issuance of this report in no way implies ULE Sustainable Product Certification, UL Solutions Environmental Product Declaration, Underwriters Laboratories Inc. (UL) Product Safety Listing, Classification or Recognition and does not authorize the use of ULE certification marks or UL Safety Listing, Classification or Recognition Marks or any other reference to UL on or in connection with the safety of the product or system. This letter is solely intended to report the environmental claims that were found to be valid and the methods used by UL Solutions to validate such claims. Any modifications to electrical components, mechanical components, materials, manufacturing processes, purchasing policies or other items, which may affect the environmental claims validated, may invalidate the claims and require full reassessment.

We appreciate the opportunity to have worked with you on this project. Should you have any questions regarding this letter or the attachments, please let us know.

Sincerely,

Shawn Chen  
Environmental Project Manager  
UL Solutions

## Proposed Audit Schedule

UL Solutions conducts facility re-audits on a three year cycle, provided there have been no major changes that would affect the audit results within the three-year period. Major changes include, but are not limited to, product reformulation, manufacturing process changes, relocation of manufacturing facility, etc. Your Environmental Project Manager (EPM) will also reserve the right to request more frequent re-auditing at an additional cost should s/he feel it is necessary; however, these decisions will be made on a case-by-case basis and only after careful consideration.

## Annual Review - Purpose and Objectives

Upon completion of your Environmental Claims Validation (ECV) project, each year you will complete an annual review of your products and environmental claims. The purpose of the annual review is to ensure your products continue to be in compliance with the environmental claims that were issued.

## Annual Review Activities

Your annual review will consist of the following activities during which we will work together to bring your renewal services to completion.

- Your team will complete an annual review declaration provided by UL Solutions, which will be used to identify any product, manufacturing and/or quality system changes during the past year.
- Review new products developed within the past year in addition to reviewing the product spec sheets and production records.
- Review new facilities, products and processes developed within the past year in addition to reviewing the diversion and production records.
- Review claim wording and make any necessary modifications based on new guidance such as the US Federal Trade Commission 16 CFR Part 260 (Green Guides) revisions and other pertinent environmental claim regulations.
- Complete an on-site audit of your manufacturing location (if necessary).
- Upon completion of the annual review, your updated certificate will be posted on the UL solutions sustainable product platform [UL SPOT](#) to show an annual review was completed.

## Scope of Annual Review

- **Validated Facility(ies):** Dongguan Tymphany Acoustic Technology Co., Ltd.
- **Services Performed:** Environmental Claim Validation Procedure (ECVP) for Zero Waste to Landfill, UL ECVP 2799 Edition 4.0, dated July 9, 2024.
- **Facility Location Audit Frequency:** Every 3 years, refer to Proposed Audit Schedule for next audit date
- **Annual Review Project Timeline:** Oct.2026 – Jan. 2027
- **Annual Review Completion Deadline:** January 8, 2027 - *Please note that if your Annual Review is not completed by this above mentioned date, we will have to remove your product(s) from the ULE Sustainable Products Database.*

- **Annual Review Fee:** To be quoted during the annual renewal (if necessary) – Please note that the fee is subject to annual price increases and changes without notice.

### **Explanation of Dates on Product Reports**

- **Report Date:** The report date is when your letter report was issued by UL Solutions, which will be updated each year when the annual review is completed.
- **Original Issue Date:** The original issue date is the first date your product received approval by UL Solutions.
- **Valid Through:** An ECV project's environmental claim is valid for one year. Each year when you renew in the program and complete the annual review, the valid through year will be extended for one year. The original valid through date is established using the Original Issue Date plus one year.

**Report Date:** 02/02/2026  
**Valid Through:** 01/08/2027  
**Original Issue Date:** 01/08/2021  
**Year Evaluated:** 01/01/2025 – 12/31/2025

**Company** Dongguan Tymphany Acoustic Technology Co., Ltd.

**Manufacturing Location(s)** Unit 9, No.135, Shijie Keji East Road, Shijie Town  
Dongguan, Guangdong, 523200, China

**Model Number(s)** N/A

The following environmental claims were validated in accordance with the following methods:

| Environmental Claim                                                                                                                                                       | Method                                                                                                                   |
